GRAVEL

KERES, una gravel ultra leggera dal design innovativo in versione elettrica (Keres Plus) e muscolare (Keres). Il telaio in alluminio è elegante, dinamico, con tubi idroformati e linee nette e pulite. La forcella multi-funzionale è in carbonio, per perno passante **M12**, e presenta l'integrazione del cavo freno e il supporto per parafanghi.

Il movimento centrale è completamente integrato nel tubo obliquo, con i posteriori bassi saldati direttamente sul tubo piantone.

Nella Keres Plus la batteria è totalmente integrata nel tubo obliquo, e protetta nella parte bassa da un coperchio in plastica realizzato su misura per completare il design pulito della bicicletta. E' possibile alloggiare nel tubo sella una batteria supplementare **FSA da 252 Wh/7 ah 36V** (non compresa), che può essere direttamente collegata alla presa di ricarica.

In tutto il telaio i cavi sono perfettamente integrati, in particolare i foderi bassi sono stati progettati per proteggere e guidare i cavi motore: la pulizia delle linee è alla base di questo progetto, per unire prestazioni e bellezza.

KERES, an ultra-light gravel bike with a cutting-edge design available in two versions: e-bike (Keres Plus) and normal (Keres). The hydroformed alloy frame is elegant and dynamic, with sharp and defined lines. The multifunctional carbon fork for **M12** thru-axle features an integrated brake cable access and fender support.

The innovating bottom bracket is integrated to the downtube: this new positioning allows for the chain stays to be directly welded to the seat tube.

Keres Plus battery is fully integrated inside the downtube, and protected at the bottom by a customized plastic cover. A supplementary **FSA of 252 Wh/7 ah 36V** battery (not included) can be added on the seat tube and connected directly to the charging socket.

The chain stays peculiar design covers and guides the motor cable, and all the other cables are perfectly integrated into the frame, combining elegance and performance.
